November 24.09

Attention: Brian Beaton; KNET Coordinator

I signed the paperwork.

I was not pleased with the outcome of the last program we participated in; but that's water under the bridge.

Look forward to working with your organization; regarding the ICT program this year. Perhaps during this time the system could be set up for tele-conference capability. The TV has been sitting on a shelf for the past 2 or 3 years.

We received a Lexmark printer. Could we perhaps exchange it for a projector; as those are more useful on our portable computer labs.

Another system that would be useful would be a system that can convert VHS to DVD. Our administrative and science learning resources are mainly VHS. If you cannot provide, please direct us to the name of the product or outlet.

Look forward to hearing from you.

Sincerely,

Yvette Blackbird,
Director of Education
